</table>

Estimated from National Household Transportation Survey (2009). National Transportation Statistics and FHWA Highway Statistics data

Lack of complete information makes this estimate provisional. All road expenditures and revenues allocated to Automobile consumer expenditures due to lack of truck revenue and cost allocation data (net effect is to increase the Automobile estimate per passenger mile)

Road person miles: household

Gasoline taxes and road user fees included in Government Expenditures rather than Consumer Expenditures Consumer expenditures include all other vehicle costs (purchase and lease, fuel and oil, repairs, insurance, etc.)
