(1) Purchasing power parity. Metropolitan areas over 1,000,000 population for which data is available. Based upon data from Eurostat, US Bureau of Economic Analysis and Japan Statistics Bureau.

(2) US data for metropolitan areas from Bureau of Economic Analysis. Scaled to World Bank 2005 GDP PPP figure.

(3) European data for metropolitan regions from Eurostat regional data. There is no generally accepted metropolitan area definition in Europe. Scaled to World Bank 2005 GDP PPP figure.

(4) Japan data from Japan Statistics Bureau Scaled to World Bank 2005 GDP PPP figure.

(5) London metropolitan area is Greater London plus the historic counties of Berkshire, Buckinghamshire, Essex, Herfordshire, Kent and Sussex (including unitary authorities), which are adjacent to the London

green belt. Some London metropolitan region GDP estimates exclude suburban areas outside the Greater London Authority. This analysis includes these suburban areas, using GVA scaling from UK National Statistics to estimate non-metropolitan contribution included in Eurostat data (Bedfordshire, Oxfordshire, East Sussex and West Sussex).

(6) Estimates for the following metropolitan areas scaled to 2005 from 2002 estimates using the closest available change estimate (metropolitan, state/provincial or nation) of the change in GDP per capita (<http://www.demographia.com/db-gdp-metro.pdf>): Metropolitan areas in Australia and Italy as well as Essen-Dusseldorf, Lyon, Marseille, Dublin, Auckland, Oslo, Zurich, Vancouver, Toronto and Ottawa.

(7) Metropolitan area data for Calgary and Edmonton estimated from local sources.
